

A Frozen-program ranking and eligibility

24,361 initially testable → exclude ZEB1/ZEB2/CD1A/CD34/LYL1 → 24,356 eligible.
Fixed BH FDR<.01 and $|\beta_R| \geq .25$: 3,560 pass; freeze top 50 per side.

B Matched Hallmark context (original significant display)

Point area = gene count; all 50 terms remain in Table S5b.
Pair-blocked expression context; no pathway-causation inference.
